

SharE-RR international registry survey

1. The SharE-RR survey of international renal registries, 2018

Thank you for completing this global survey of renal registries - part of the International Society of Nephrology project: SHARing Expertise to support the set-up of Renal Registries (SharE-RR). SharE-RR supports the development and sustainability of renal registries around the world. Further details can be found on the ISN website www.theisn.org/advocacy/share-rr

The answers you provide to this survey will be shared via an online resource. The survey will take around half an hour to complete, depending upon the size and complexity of your registry and will need to be completed by someone with good working knowledge of their registry. You should aim, if possible, to complete the survey in one sitting to avoid potential loss of data. If you have any problems with the survey or require further information, please contact katharine.evans@renalregistry.nhs.uk

Kind regards,

You are answering questions about your international registry (covering two or more countries).
If you manage a national/regional (covering only one country or part of only one country), please
complete the survey available here www.surveymonkey.co.uk/r/SharE-RR

If you manage both an international and a national/regional registry, please complete the
national/regional survey first, then the international survey.
