

Larisa Prikhodina

Short Bio/CV

Dr. Larisa Prikhodina is Professor of Pediatrics and Head Researcher of the Department of Inherited & Acquired Kidney Diseases, Research & Clinical Institute for Pediatrics n. a. acad. Y.E. Veltishev, **Pirogov Russian National Research Medical University** and Department of Pediatrics, **Russian Medical Academy of Postgraduate Education, Moscow, Russia**. She received her M.D. in 1994 at Pirogov Russian National Research Medical University. She performed scholarships in pediatric nephrology at the Institute of Child Health and Great Ormond Street Hospital, London, the UK, the Hannover Kinderklinik, Germany and Hospital Katholieke University, Leuven, Belgium.

Her **research interests** include the genetic basis of steroid-resistant nephrotic syndrome and hereditary kidney diseases, the risk factors of CNI-mediated nephrotoxicity in pediatric nephrotic syndrome, physiopathology and prevention of kidney disease progression.

She is actively involved to numerous **international research clinical trials** including the *PodoNet* (Clinical, Genetic and Experimental Research into Hereditary Diseases of the Podocytes), *Autosomal Recessive Polycystic Kidney Disease Registry (AREgPKD)*, *Autosomal Dominant Polycystic Kidney Disease Registry (ADPedKD)*, *OxalEurope* (Genotype/phenotype correlations in patients with primary hyperoxaluria), *Genome-Wide Analysis in Steroid-Sensitive Nephrotic Syndrome*, *Genotype-phenotype associations in Dent disease*, *Non-invasive biomarkers of HNF1 β nephropathy*, the European Society for Paediatric Nephrology (ESPN) study of pediatric renal care in Europe

Dr. Prikhodina has served on multiple **professional boards** including the ISN Sister Renal Centers Program Committee, the Councils of the International Pediatric Nephrology Association (IPNA), ESPN, the Scientific Society of Nephrologists of Russia and the Russian Association of Pediatric Nephrology. She was a member of Scientific committees of the 16th-18th IPNA Meetings, 45th, 48th and 51st ESPN Meetings.

She won several **international awards**, including The Best Abstract (50th ESPN Meeting, 2017) and Poster Presentation Award (World Congress of Nephrology, 2003), National Grant of ERA-EDTA (2006).

Dr. Prikhodina's **publication record** encompasses 225 scientific articles in Russian and International Journals and book chapters. With more than 199 citations to date, her current [H-Index](#) is 8.

Dr. Prikhodina also has reviewed papers at several international journals, including *Pediatric Nephrology*, *Journal of Nephrology*, *BMC Pediatrics*.

Candidate's Statement

Statement of plans as candidate for 2021-23 NIS and Russia Regional Board Deputy Chair/Councilor in 2021 ISN leadership elections

Dr. Larisa Prikhodina, MD, PhD

If I had the honor to be elected as the ISN Councilor, I would like to work passionately to forward the mission of the ISN to advancing kidney health worldwide through education, research, and advocacy.

I would have the privilege to improve cooperation of NIS and Russia with the ISN as well as coordination inside of our region using active involvement of local nephrologists into really useful the ISN programs and initiatives, including ISN Academy by announcing all information through regional national professional societies, newsletters and journals translated in local languages with support of members of our team.

With the ISN support and global inventory of renal registries tools I would try to establish renal registries in countries of NIS and Russia to identify causes of CKD in adults and children and discrepancies in available kidney care in order to allocate needed resources to create a strategy for the prevention, detection, and early treatment of CKD.

I would be happy to create a network of kidney health supporters able to promote the local need for improved kidney care to key decision-makers and stakeholders at NIS and Russia regional level.
