

Angela Yee-Moon Wang

Short Bio/CV

Dr Angela Yee-Moon WANG, MD, PhD, FHKAM, FHKCP, FRCP (Lond & Edin), was graduated from the University of New South Wales, Australia and is a staff nephrologist and clinician scientist at the Queen Mary Hospital, University of Hong Kong, Hong Kong.

She is the current President of International Society of Renal Nutrition and Metabolism (ISRNM), Regional Board member of ISN, Council member of International Society of Peritoneal Dialysis (ISPD), Core group member of Asia Chapter ISPD, Executive Committee member of SONG Initiative and previous Executive Committee Member of KDIGO. She is a committee member of ISN-Advancing Clinical Trial and Subject Editor of ISN Academy.

Angela has chaired the ISPD Adult Cardiovascular and Metabolic Guidelines 2015 and was a workgroup member of Kidney Disease Outcome Quality Initiative (KDOQI) nutrition guidelines in CKD 2020, ISPD Prescribing high quality PD practice recommendations 2020, ISPD-Global Renal Exercise group (GREX) exercise recommendations in PD 2020 and KDIGO – CKD-Mineral Bone Disease guidelines 2009.

Angela has received several international research-related awards including Joel D. Kopple Award 2018 of United States National Kidney Foundation, Travelling Lecturer Award of Asia Pacific Federation of Clinical Biochemistry 2012 and John F. Maher Award of ISPD 2006.

She currently serves on the editorial boards of JASN, KI, CJASN, NDT Theme Editor, Am J Nephrol, Nephron Clinical Practice (Associate Editor), J Renal Nutrition, J Diabetes, Kidney Medicine and Renal Replacement Therapy (Associate Editor), etc and is Editor-in-Chief of European Medical Journal-Nephrology. She was Associate Editor of AJKD and International Editor of CJASN previously. She chairs the Scientific Program Committee (SPC) of 40th congress of ISRNM 2022 and is the End-Stage Kidney Disease Theme Chair of WCN 2022 SPC.

She has published over 180 original articles, 13 book chapters and given over 120 invited lectures in international, regional and national meetings. Her main research interests are cardiovascular, metabolic and nutrition complications in CKD & dialysis & clinical trials.

Candidate's Statement

I seek to contribute to the mission and strategic plan of ISN for integrated care of patients with kidney failure and facilitate knowledge exchange, advocacy, education, research and collaborations in the region to advance kidney health. It is a priority to engage global kidney community to bridge gaps in kidney care, especially in emerging countries.

Specifically, I wish to contribute to 'Dialysis' and 'Resources' themes of ISN strategic plan. I wish to help strengthen liaison with kidney community in the region to participate in the Share-RR project. With my clinical and research strengths in CKD and dialysis management and experiences in guidelines development, I seek to contribute to defining quality and safety standards and developing resource sensitive recommendations as well as monitoring framework of sustainable dialysis, dialysis care delivery models, essential workforce training and competencies, dissemination of guidelines and standards for countries implementation, and progress monitoring in the region. I aspire to promote more collaborative clinical trials in the region to advance evidence-based kidney care, promote patient-centred kidney care and more effectively prevent progression of kidney disease.
