

Kirill Komissarov

Short Bio/CV

Biography

Dr. Kirill Komissarov is Head of nephrology, renal replacement therapy and kidney transplantation department of State Institution “Minsk Scientific and Practical Center for Surgery, Transplantology and Hematology”, Minsk, Republic of Belarus and associate professor of Belarusian Medical Academy of Postgraduate Education.

He received his MD from Minsk State Medical Institute, Minsk, Belarus in 1997 and completed his residence in medicine in 1998. He became specialist-nephrologist in 2004. Dr. Kirill Komissarov worked in nephrology unit at the 4th City Hospital, Minsk, Belarus in 1998 – 2006. He served as a consultant, the associate professor for The Department of Urology and Nephrology at Belarusian Medical Academy of Postgraduate Education, Minsk, Belarus for the period of time 2009 – 2019. He has been Deputy Chief Executive Nephrologist of Ministry of Healthcare Republic Belarus since 2018.

He did scholarships in nephrology at Amsterdam University Medical Center, Amsterdam, Netherlands (2003), Sir Charles Gairdner Hospital, Department of Renal Medicine, Perth, Western Australia (2019). Within ISN educational programs as a fellow he performed scholarship at Charite-Mitte, Berlin, Germany (2003), the Churchill Hospital, Oxford, England (2006) and Ospedali Riuniti of Bergamo and Clinical Research Center for Rare Disease Aldo e Cele Dacco, Ranica, Bergamo, Italy (2019).

His PhD thesis “The influence of different dialysis modalities on functional condition of myocardium in patients with end stage renal disease” from the Belarusian Medical Academy of Postgraduate Education, Minsk, Belarus was defended in 2006 under mentorship of Professor Valery Pilotovich. At present time he is interested in pathogenesis and treatment of IgA-nephropathy, chronic active antibody-mediated rejection in renal transplant recipients and complications of chronic kidney disease in elderly patients.

Kirill Komissarov has been an ISN member since 2012. He is actively involved in numerous ISN projects: member of NIS and Russian Regional Board of ISN, member of committee of Continuing Medical Education Program and Fellowship Program. He has been Center Liaison Officer of ISN Sister Renal Centers Program Belarus-Germany over the period of 2013 – 2021. His Center won Schrier Award in collaboration with Prof. Klemens Budde in 2022.

He is a current member of ISN, European Renal Association, Russian Dialysis Society and Belarusian Society of Nephrology".

Candidate's Statement

If I had the honor of being elected as the ISN Councilor, I would bring my experience, professional skills and energy to contribute significantly to the key ISN priorities and values.

In this tense and unstable political situation in NIS and Russia I would try to direct efforts to saving existing relationships in the region as well as to continuing building new connections with other affiliated societies, especially from Europe.

Thanks to the achievements of NIS and Russia regional board the annual member's fee got reduced last year. I would continue working to increase number of members from the region by restoration of joint group membership for young nephrologists and waiving any fee for Ukraine in these difficult times for the country.

I believe that professional education process can be stimulated by widely using ISN Program of Educational Ambassador with much attention to specialists in the region and especially to those who is involved in ISN Working Group.

I am convinced that an improvement in kidney disease diagnostic and treatment in the region can be achieved by discussing the issues in collaboration with International and Local experts widely using Internet Conferences and Webinars in the frame of ISN Internet Platform.
