## TRANSFORM. Controls and analysis in preclinical models of kidney disease

Control groups must be used in preclinical studies of kidney disease
Justification and detailed reporting of controls are mandatory

Consider whether an experiment involving animals can be performed using organoids or organs-on-a-chip

Nangaku M et al. International Society of Nephrology first consensus guidance for preclinical animal studies in translational nephrology. *Kidney International*. 2023. https://doi.org/10.1016/j.kint.2023.03.007
